- Gained valuable industry experience at Bharat Forge, contributing to AI & Machine Learning.
- Developed my skills in Machine Learning and Deep Learning.
- Honed problem-solving abilities and gained insights into the manufacturing industry.

Projects

Facial Recognition Attendance System

This system automates attendance tracking by accurately recognizing individuals through facial features, significantly minimizing administrative tasks and boosting security. It integrates seamlessly with existing infrastructure, offering organizations a streamlined and efficient attendance management solution.

Automated Notice Generation and Emailing System

This system automates the creation of notices and emails triggered by predefined events, ensuring timely and personalized communication with stakeholders. With integration into reliable email delivery mechanisms, it boosts efficiency, accuracy, and scalability in distributing important information, thereby enhancing organizational communication workflows.
