BRIEF SUMMARY

I am a proficient software developer with extensive knowledge and experience in Core Java and advanced Java concepts, including Object-Oriented Programming (OOP) and multithreading. I possess a strong foundation in Data Structures and Algorithms (DSA) and have a proven track record of developing high-performance, polished applications using JavaFX. My expertise extends to operating systems, particularly Linux, where I excel in ensuring system stability and managing processes effectively. In addition to my Java proficiency, I am well-versed in database management systems (DBMS), with fluency in both SQL and NoSQL databases for comprehensive data storage, querying, and manipulation. My commitment to writing high-quality, efficient, and maintainable software solutions is grounded in both theoretical knowledge and industry best practices. I am adept at applying advanced Core Java principles and leveraging multithreading and concurrent programming techniques to create robust, user-friendly applications. My Linux expertise allows me to maintain system stability and manage processes efficiently. Furthermore, my proficiency in SQL and NoSQL databases enables me to handle data management tasks effectively. With a strong focus on software quality, efficiency, and maintainability, I consistently deliver software solutions that meet the highest standards of performance and reliability.
